The Douglas State Committee of Penning-yania have decided by a vote of about nine to ten to repudiate the regular Democratic mod-toral ticket nominated before the meeting of the Charleston Convention—or so much thereof as is not openly for Douglas and Johnson They will proceed to nominate a new ticket selecting their own friends from the regular ticket, and naming others for the places filled by the Breckinridge man. Of course the other faction will be compelled to pursue a similar course. Meanwhile things are getting somewhat "mixed" as regards the Democratic.

was presented and agreed upon at the meeting
of West Side residents a short time since,
which, with some small amendments, was put
upon the last prinage, and became an ordinance
by a rose of ayes 11, says 4.

The ordinance has been presented in our columins. We doubt if very many have read it, of
those who claim, as West Side residents, to be

cities form than that of reading half a column of solid again. We may say brighly then, that the ordinance as passed, grants to the Pittaburgh, Fort Wayne & Chicago, and the Chicago & Northwestern Ball-road Companies the Ismporary right to lay their tracks of grade across the bridge-streets of the West Divisions; allowing them, under stringent restrictions, the use of the alloy for that purpose, the companies functionally after having made such connections, to commence the building of the inversal tunnels under Lake, Randolph and Madison streets, in the manner in said order receifed, of which tunnels, they ner, the some actually prograding from the field and wounding him in the side.

The Case Massron.—In our notice of the came meeting, in Thursday's issue, we gave the 80th task, as the fait of its commencement, which was an error. The meeting is to begin on Wednesday, the 50th inst., and continue ever the Subbath following.

Without giving further details of points in the ordinance, it is enough to say that it is presented by all, an abundantly guarding the interests of the city, and so is a large advantage sained own its first form, whose passage we were prompt to raise our voice against. Three years time is granted these companies to compiste the tunnels, about a obtaines connected with right of way and the opposition of owners of property abuting on the tunnels reader the same necessary.

There is one thing we desire to say, as it is but fair to remind West Side residents that every opportunity has been given for an expression of views. Our own columns have been open to the discussion, two public meetings

Hen, Wm. B. Ogden was present at the Council meeting on Saturday evening. As the Receiver of one of the connecting reads, and President of the officer, he occupies a position no one shares with him in this question, and it is toriumate that such weighty interests find their exposuration one whose integrity and nobleness are unimpeachable in this community. At the equest of the Council Mr. Ogden made a terremarks, explaining the project and its history, and referred at some length to the crossing at Yan Buren street. The points suggested by Mr. Ogden about he distinctly borne in mind at the meeting this ovening.

The crossing at YanBuren street, unlike that of the streets named in the ordinates, will not be at the absument of the same, rendering the

to at the abutment of the bridge but some for sundred feet west of the same, roudering the matter of a tunnel at that point for more for midable, and, as is confessed, more undesirable raless by a change of the grade of the Division at that point, in which time Mr. Ogdan pladge his word a funnel shall be built. The ordinance as passed awaits the accepiance of its terms by the Companies, and it ity thereafter, their wast Side Union ong oproted by residents of that se ecome a substantial matter of fact.

Shall our Mechanic's Institute Fair be a Success ! Having been appointed by the President and the Board of Directors to superintend the Tenth Exhibition of the Mechanic's Institute, to open August 26th, 1860, I deaire, as all citizens should, that this effort prove an entire success; Exhibition of the Reenance's larged to corporate the history and the little and the latest prove an entire success; and on my part, as Superintendent, I promise to mechanics, manufacturers, artisans, farmers forticulturists, merchants, and to all, that no effort calculated to further this exhibition shall be omitted. I instead to give myself to the work of caring for, and, as far as possible, mesting the wishes of Exhibitors. That our efforts may prove unscessful I estructly invite prompt and energific action on the part of all who can in any way add to the general or special interest of this exhibition, the success of which will prove alike boneficial to all. The President, Board of Directors, Committee on Fairs and the Superintendent may all do their duty, but without general interest and prompt action on the part of producers, the Fair cannot be what all would wish it to be. No exhibition of this kind can succeed to perfect secones without the helping hand, taste and skill of the ladies. In order, then, that our Fair may prove what they themselves would desire it should be, may I not sak that they come to our help, and give us a fine display of their skill-uil and tasty workmanship; and before the opening of the Fair may I not hope to receive their usual generative and good judgment in decorating the Wigwan? Young Misce, apprendices and children are also expected to add much to our success.

Our seconomodations far surpass any ever offered by the function; and all can have ample spaces for display. I say, then, bring your tithes into the Wigwam, and prove us that there shall not be room to receive them.

The Zonavas.—We call attention to correspondence which explains itself, and does but justice to the very general desire on the part of our citizens to witness the matchless drill of our Chiesgo Zonavas. It does not of necessity belong to a class of cases covered by the old have of "prophet and without home in his own country," for the Zonava were the beast and the pride of all among us who knew aught of mili

pression of views. Our own columns have been open to the disemsion, two public meetings have been called, and the ordinance, as peased, is the besis on which the West Side invite these great connecting lines to an union on the west bank of the river. It is too late for any body to complain, even if any one is so dispessed, and we write with reference to the meeting called on the question of the Van Buren street crossing, this evening. It should have had a representation and discussion before this tendy show of opposition.

It will be seen that the seen there mere majority than Fremonia as to would have been in the other counties in the table, had the same exertions Laselle, Whiteside and Will; and they really put forth prodigion tribits. They punched up the Republicane just amough to show the felly of the attempt; but not enough to bring out the full hardstand out. Hence there is out the full handless on the Fremont majority in some of Edward.

Our table forms three things, left to the counties when the Republicant extred the Republicant extred the first the Fremont majorities. they have they compared with 1865.

hat the disturbances there are not due to me-troes alone; but that white men of some sort groes alone; but that white men of some sort are accessory to the incipient insurrection. Making ducadlos ance for the prevailing fright for the gross exaggerations of the reports an they fly from mouth a mouth, and for the chronic disposition of elave-holders to attribute all otherwise unaccountable visitations to the niggers "and thus," A balticinits," we are compelled to believe, if we give any credit to the current accounts of burnings, the confessions of the alares, the finding of the Acceptable of the property of t

That there are others, who, by long brooding over the daily enormi-ies and the continual atheism and barbarism of American Slavery, have emissated, the wear American Slavery, have collected the be-is that they are, under Providence, the aphough the consequences may be reason to ad rivers of blood, the South has reason to know. We need not go outside of the agen-

murder than to prove the untenableness of the positions or the lack of patriotism in their policy, we do not wonder that the charges are added for and wide.

The Texas and New Orients papers are so reticent in their relations of current events, that, beyond the alleged burning of a dezen or two cross-road settlements, the finding of a few stands of arms, the confession of a few negroes, the hanging of a dosen or more, and the whipping and expulsion of either, whits man, we know nothing. The purposes attributed to the insurgents are so mixed up with plans that the inargents are so mixed an entering in a man in his senses could conceive, and that no slave is ignorant enough to attempt to carry out, that we chappt separate the true from the false—the facts from the myths. But as N is described are pursuing their plans of revenge, or working out their schem a of false philanthrophy, in that far-off field. The whipping and burning of a hundred or so of the misguided negroes, the hanging of a score or more writte men who are probably as innocent of the crimes laid at their doors. It South Side Adams or the Peckaniff of the New York Observer, the injusion of new intolerance and hate of free institutions to which the outbreak will be attributed, into the minds of the terrified despots, will be the present results. If the people of the North and of the border States see in the atrocities contemplated by the negroes and the just as horrible atrocities perpetrated in the strocties contemplated by the negrots and the just as horrible attocities perpetrated by their masters; see in the growing inascurity of communities resting on a servile basis, and see in the immediate, imperative necessity for restricting and denationalising an institution which yields such bitter fruit, a necessity for prompt political action, the out hreak will not be without its wholesome teachings.

Rectaurant Ratil-sara
One of the latest phases of American cirillantion has shown itself in the catalitation has shown itself in the catalitation has shown itself in the catalitation of the country. The smoking car has long been a recognized institution. Sensething beyond all this has just been commenced on the line of travel between Harrisburg and New York via Reading, Allentown and Baston. A resustant car is stabled to seek through train, where travelers may procure things to eat and drink, even more comfortably than they could at the stations along the road.

It seems strange that this plan has not been adopted heretefore on other roads. In order to attitude the specifies of traveler, trains have to attify the appetites of traveler, trains have to the province of the prov

The laie heavy thunder storms with which we have been visited, and the practical effects of these visitations, so plainly seen and foil about up, has had the not very unnatured effect to produce timidity and nervousness in some people on the approach of autorm, and the fair six exhibit is to a considerable extent. It is true that ladies here, as sleev here, are not huminal to conductors, but the electric spark is not the spark of their choice, and therefore, when a thunderstorm arises, the first thing the fair creatures do is to render themselves unstiructive and non-conductive, and, as a consequence, they reduce themselves by the subtraction of their steel hoops.

An instance of this was manifested at a very recunit evening party, in a village not a thousand miles distant. While all things were going on merrily, a thunder storm came up suddenly. No sconer has the disments commenced working lively, than a panie took place, and is stangeds was made to the retiring room. Here, in less time than it takes to repeat the first, each particular "hoop" was shed, and to the number of about thirry, were thrown into one corner of the room, and there ign to "attract" whatever loss lighting might come that way—while the ladder, with apparently authors of first, ladgraph. of the Highlands was so more.—N. A picture by Marillo (the Immanulas Conception) was knocked down is 2,000 guiness. A picture by Wigrix for 750 guiness, and a few others in an hour and a half for about 18,000 pounds! Yet, even at these encormous figures, it is reported a sale did not settially take place, so extravagant were the notions of the proprietor, Lord Kard. ley. The remaining portion of the Lawrence collection of drawings by the old masters was recently sold, it consequences of the death of the list of the Woodburns. The British Museum has a extra grant of £9,500, and this caused the whole to be sold at unusually high priese.
